

Yehia Mahmoud Hamed Saeed

[in yehia-mahmoud-hamed-saeed](#) | ym385426@gmail.com | [+20 100 112 1246](#) | [Alexandria, Egypt](#)

SUMMARY

A highly motivated Data Science student with a strong academic foundation in statistics, machine learning, and data visualization. Proficient in Python, MySQL, and data analysis tools, with hands-on experience in cleaning, modeling, and interpreting complex datasets. Demonstrates strong problem-solving skills and the ability to translate data into actionable insights that support decision-making. Passionate about applying analytical and technical expertise in a dynamic internship environment to drive data-driven innovation.

EDUCATION

2023 - 2027 **Bachelor of Science in Computers and Data Science**
Alexandria University (Expected Graduation: 2027)

TECHNICAL SKILLS

Programming Languages Python (Pandas, NumPy), Java, MySQL

Databases & Warehousing SQL Server, ETL Pipelines, Data Cleaning

Data Visualization & BI Power BI, Advanced Excel (Dashboards, Pivot Tables, Formulas), Statistical Analysis

Languages Arabic (Native), English (Very Good)

PROJECTS

Academic Data ETL Pipeline Python, Pandas, MySQL

- Designed and implemented an end-to-end ETL pipeline to process over 10,000 academic records
- Utilized Pandas for data cleaning and transformation, reducing data processing time by 40%
- Automated the data ingestion process using scheduled cron jobs, ensuring regular data updates

Student Management System Java, SQL Server

- Developed a full CRUD application to manage student records, featuring an intuitive console interface
- Optimized database performance by 20% through the strategic implementation of SQL indexes
- Engineered complex SQL queries for efficient data retrieval and manipulation

Sales Analytics Dashboard Power BI

- Built an interactive dashboard to visualize and analyze a dataset of over 5,000 sales transactions
- Identified key customer purchasing trends and provided actionable insights for sales strategy
- Implemented dynamic filters and slicers, significantly improving user navigation and report readability

Smart Traffic Management System (IoT) ESP32, Sensors, Servo, LCD

- Architected and constructed a functional prototype for an automated traffic control system
- Integrated various sensors and servo motors to dynamically manage traffic flow based on real-time input

CERTIFICATIONS & TRAINING

DataCamp

[Data Engineering for Everyone](#)
[Data Manipulation with Pandas](#)
[Introduction to Data Engineering](#)

Arab Academy for Science, Technology & Maritime Transport

[Introduction to Programming Using Java](#)
(Oct – Dec 2023)

LIFE Global

[Data Science and Analytics](#)
[AI for Business Professionals](#)

EXPERIENCE & ACTIVITIES

Organizing Committee Member

GDG (Google Developer Group) FCDS

- Volunteered to coordinate and promote technology workshops and community events for students
- Developed strong teamwork, communication, and event planning skills in a dynamic environment
